Highly skilled and experienced Mobile Developer with expertise in Flutter framework and Laravel API. Specializes in developing cross-platform mobile applications for iOS and Android platforms. Proficient in designing, implementing, and maintaining mobile software solutions, integrating with Laravel APIs for seamless data exchange and enhanced functionality. Demonstrates expertise in creating visually appealing and performant applications using Flutter. Collaborates effectively with cross-functional teams to deliver high-quality and user-friendly mobile applications. Strong problem-solving skills and passion for staying updated with the latest mobile development trends. Committed to delivering exceptional results and exceeding client expectations.

WORK EXPERIENCE

Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH
App Developer

• Yemen • 08/2023 – 01/2024

- In the Mobile Bootcamp program, I gained experience in using Flutter to develop cross-platform mobile applications with visually appealing interfaces. I also learned Laravel for managing APIs and integrating them with mobile apps. Git was used for version control, including creating branches, merging changes, and resolving conflicts. GitHub was utilized for collaboration and sharing code with team members. Jira Software was employed for project management, task tracking, and issue management.

EDUCATION

Bacloria in Information technology

Hadramoot university • 08/2019 - 10/2023

An information technology specialist at Hadramout University is trained in various aspects of IT, including computer systems, programming languages, algorithms, data structures, networks, and databases. They have the ability to develop web applications using HTML, CSS, and JavaScript, and create interactive user interfaces. Additionally, they possess proficiency in database management, network protocols, network engineering, network security, and software testing methodologies. Moreover, they are skilled in mobile development, able to create mobile applications for platforms such as iOS and Android using languages like Swift, Java, and Kotlin. They have a solid understanding of information security principles, encryption, authentication, access control, and vulnerability assessment.

SKILLS
